ENGINE OIL TREATMENT

DESCRIPTION

ENGINE OIL TREATMENT is a fast-action, multi-power oil additive engineered for high performance engines. It is engineered to improve the oil by helping to retain its normal viscosity during constant changes in temperature. By coating the engine with a film of oil, **ENGINE OIL TREATMENT** prevents premature wear, improving engine performance and prolong engine life. This product also helps stop oil burning, reduces hydraulic valve lifter noise and improves compression. It is compatible with both petroleum and synthetic oils. In addition, **ENGINE OIL TREATMENT** is recommended for use in both gasoline and diesel engines.

FEATURES AND ADVANTAGES

- Maintains engine power and performance
- Improves engine power and performance
- Improves engine compression
- Improves fuel efficiency
- Maintains high viscosity properties
- Fights motor oil breakdown
- Compatible with mineral and synthetic based oils
- Engineered for both diesel and gasoline engines
- Ideal for single & multi-grade engine oils

TYPICAL SPECS

API Gravity	29.5
Flash Point, °C	220
Viscosity	
cSt @ 100°C	350
Color	1.5
Appearance	Bright & Clear
Product Number	
24x15 oz.	10100
