REV. MAY 2017

RXP FORK OILS

DESCRIPTION

RXP Fork Oils are formulated with the highest quality base oils and unique additive systems to improve performance and extend the life of your fork.

FEATURES AND ADVANTAGES

RXP Fork Oils are High Performance products designed to prevent seal hardening, oxidation, oil thickening, foaming and static friction. These are high viscosity index fluids that reduce thermal expansion and formulated to provide better wear protection. Designed for use in all systems, including damping rod, cartridge, bladder, conventional and inverted forks.

- Produced from highly refined base oil stocks
- High Viscosity Index
- Low pour points
- Excellent oxidation resistance
- Protects critical seal components

TYPICAL SPECS

Tests	Method	SAE 5	SAE 7	SAE 10	SAE 15
Color	Visual	Light Amber	Light Amber	Light Amber	Light Amber
Gravity, API	D-4052	33.04	31.26	31.12	30.43
Specific Gravity @ 60/60°F	D-4052	0.8598	0.8692	0.8700	0.8737
Pounds per gallon	D-4052	7.170	7.248	7.255	7.286
Viscosity		-			
Viscosity, cSt. @ 40°C	D-445	10.0	16.1	26.0	46.2
Viscosity, cSt. @ 100°C	D-445	3.55	5.1	7.5	11.1
Viscosity Index	D-2270	290	287	283	242
Flash Point, °C (°F)	D-92	96 (205)	176 (350)	176 (350)	215 (419)
Pour Point, °C (°F)	D-5950	-57 (-71)	-54 (-65)	-48 (-54)	-45 (-49)
Product Numbers	12/1 L Btle 11033		11034	11035	11036
