

## *TOP 1 OIL PRODUCTS COMPANY PRODUCT DATA SHEET*

Revised: Sep. 2017

## DESCRIPTION

MC BRAKE FLUID is a specifically formulated brake fluid for disc or drum applications. Fully compatible and neutrally

mixes with other brake fluids of similar specifications.

## FEATURES AND ADVANTAGES

- •For use in motorcycles, cars, and trucks
- Provides protection against brake failure from vapor lock
- ·Helps prevent corrosion in the brake system

## TYPICAL SPECS

| <b>GRADE, SAE</b><br>Physical State<br>Color<br>Odor | TEST        | <b>DOT 3</b><br>Liquid<br>Colorless and Red<br>Mild |
|--|-------------|---|
| Flash Point, °F                                      | ASTM D-93   | 289.9   |
| Vapor Pressure, mmHg@ 20°C                           |             | <0.01   |
| Boiling Point, 760 mmHg °C                           | ASTM E-179  | 284   |
| Dry, °C  | FMVSS 116   | 260   |
| Wet, °C  | FMVSS 116   | 145   |
| Vapor Density  |             | 7   |
| Specific Gravity                                     | ASTM D-4052 | 1.010-1.040   |
| Freezing Point, °C                                   |             | -47   |
| Solubility in Water, %                               |             | 100   |
| pH   | FMVSS 116   | 7.0-11.5  |
| Kinematic Viscosity                                  | FMVSS 116   |   |
