

PRODUCT DATA SHEET

ENGINE OIL TREATMENT

Description

TOP 1 Engine Oil Treatment is a specially formulated additive package used for increasing the overall performance of engine oil. Suitable for all petrol and diesel engines. TOP 1 Engine Oil Treatment increases the viscosity index, making the engine oil more viscous (thicker) at higher temperatures to ensure higher oil film thickness.

Features & Advantages

Maintain Engine Power and Performance

Makes Engine Run Smoother, Cooler, and Quieter

Compatible with Mineral and Synthetic Based Oils

Improved Fuel Economy

Improves Compression

Reduces Oil Burning

Reduces Engine Wear

For Gasoline and Diesel Engines

Typical Characteristics

Name, units	ENGINE OIL TREATMENT
Appearance	Clear Amber Color Liquid
Flash Point (COC), °C	>170
Specific Gravity @ 20°C	0.88-0.90

GO SYNTHETIC
